I have tried this several times before and was not able to do be recognized... I watch RFD TV on Dish, and rely on their programming for agricultural news, weather, and markets. Also my mother Hilda loves the music venues, especially the polka music shows and thinks that Mollie B. is the absolute best!!! She waits anxiously for those shows.

I feel we need these channels as much of the regular fare on other channels has nothing to offer for those of us who live in rural areas. It is also a good information outlet to help urban residents understand how what happens on the farm affects their lives in the cities. Thank you for your consideration and support of these stations that provide this service.
