Dear FCC, We watch RFDTV on direct tv. We receive 250 channels on direct tv, but only a few are of any real value. We watch RFDTV, Iowa public tv, Nebraska public tv, the Omaha network stations , encore westerns, and the history channel. Please do not allow the powerful big companies to restrict smaller independent stations like RFDTV. We all need to understand the value of agriculture. Food and water could become more difficult to produce in the future. The folks in urban areas really need exposure to farming, ranching, and the rural way of life. I know you have a big job at the FCC. Please consider us who already feel under represented, thank you! Jon W. Hawes
