Dear FCC,

Please help protect our rural independent programming. I have DIRECT TV. I grew up on a small family farm, the programs like Cattleman to Cattleman, Rural News and weather programs are very helpful. Ag-PhD very informative good quality family programming, Larry's country dinner, music entertainment, Georgia Farm Monitor and other programs is very informative, we can learn what others states are doing to help make our family farms more productive and clean for future generations. Cattle auctions and equipment auctions is another avenue that we can sell cattle and buy equipment to improve our farms. Veterinarian products, fertilizer distributors information we other wise would not hear about. Thank you for your support of America's Ranchers and Farmers and the Urban network programming. GOD BLESS AMERICA!!! THE LAND OF THE FREE AND HOME OF THE BRAVE!!! Farmers feed the world. Please help us.
