My husband and I watch RFD-TV on our provider, DISH. It is a very important part of our lifestyle; we not only watch the Market Reports for farm and animals, but we also watch the programming on horse care, rodeos (national and state) and other programming that represents country living and farming. We cannot find these kinds of programs on other stations. RFD-TV is an important part of our viewing preference; therefore, we feel that the FCC wanting to discontinue this programming is basically saying to us country and farming people that what we want means nothing to them. Stop the harassment FCC and quit your discord on cancelling RFD-TV.
