I watch RFD-TV on Dish network. Of all television programming, I have more faith in RFD news and all other broadcast programs. All of their programming is clean and enjoyable.

We also watch Sports programming, The Weather Channel, and the other networks that have been dropped or never started by the Cable networks.

The programming on other networks is almost entirely ridiculous and the news programming on the major networks is certainly not believable because it is so biased. I would really like to see the independent programming continue on Dish in particular and on other Cable systems also.
