We are asking that you FCC and the powers to be address the big media control organization become limited in their power. Leave shows like RFDTV, weather channels, sportsman shows and other rural and small cable programs alone. The wholesome programs , family oriented, moral based and even Christian based television is being attached and asked to be removed from a few large corporations. There are in place anti trust laws from the mid 1900's that are not used, there needs to be people from or an equal voice from the people who feed the country and much of the world, from those who fight for out country and there are a small portion of people who pay the taxes that are not urban and liberal.... these less then 2% populations need a voice and there needs to be choices and means for people to be informed and not kept ignorant to be open minded and more respectful of all people.

Please keep these viewing opportunities and open the opportunity for more creative and educational and family friendly TV available.

Thank you
