Submission is in reference to Application 471 Number 1051590 was submitted on April 16, 2015 but was not certified until April 22 of 2015. This was submitted within the deadline but the consultant failed to have one of the employees certify until the 22nd. The application appears to be certified out of window and pending. We would like to have a decision made as our school has followed through on these services and paid on time monthly payments and are still currently under contract for these services. Contracts were signed 3/24/14 and we were funded for these services in the 14-15 funding year. In 15-16 we were still under the contract. We are continuing with these services we have paid for them every month. Our budget structured around the expectation of receiving this discount on these services.
