Satellite Companies are squeezing out the smaller unaffiliated companies and this has been going on unchecked by any organization. Seems like the little man has no rights. Please send a message to telecommunication industry. We have basic rights. We are limited income and rates are hiked. All these big guys like ATT, Dish, Direct TV, Comcast, Verizon, etc. have vertical monopoly. They control everything and go unchecked. It took over 2 YEARS to get ATT to replace a pole on edge of road so static was removed from line so we could have 911 in this rural area. Every time it rained or had dew static or a dead line prevented basic service. I had to use Better Business to get corporate office to do something, and ATT is only provider. Cell phone service is very poor, so there's no alternative. . this goes on all the time/every way. Please help. Be an advocate for the small man/small business like RFD.
