Corporate Alienation of Rural Networks and Local TV - Is there enough room for at least ONE rural network?? We love and have to have RFD. We depend on its updates. It brings the agriculture industry together. Presents innovative ideas farmers are doing across the world not just America. Its foundation is built on America's guiding principles. I'm proud to be an American and work hard. RFD is a compilation of modern wonders. Just because the advertiser are not mainstream does not mean it's profitable. The majority of farmers and ag careers handle multimillion dollars each year we do more with less. We are always at the bottom of list and we have to be more efficient. RFD programs teach us how to REDUCE. Reduce cost, reduce labor cost, reduce waste. It is IRREPLACEABLE. Don't let it be a casualty of mega corporations. GREED. RFD links urban to rural and we have to know where our food comes from. Help save small town USA
