Level Playing Field for Independent Networks - Corporate bigwigs are destroying America. They are money hungry and deliver less and less! Rates go up service goes down I use satellite to get access to RFD and they want to drop it. If I am forced to get another provider I have pay high cancellation fee even though they break the contract no me. ATT/Verizon/Comcast/Time Warner has a LICENSE TO STEAL. They have a code lock on the whole supply line. They are the gate keeper to do telecommunications. They even threaten access to sires FM channels. RFD is being squeezed out in that avenue also. We will be in dark ages before long if there is not limits on their power. And suppose RFD got with Trump they would never be able to put up their own satellite. ATT/Verizon/DirectTV/Dish would cut them off before they got off the ground. How fair is that??
