concerning 16-41 - I watch RFD TV on Frontier Cable
this station is very important as well as entertaining and wholesome information
cable networks are eliminating all too many good shows and stations and replacing
with stations that are insulting and appalling and little entertainment value
we have no say over programming and it is continually getting worse by the week.
now they no longer have set times and stations for programs, they have moved
programming all over the stations - very hard to find shows worth watching and never
at same time or station.
cable companies are continually downgrading to cheaper stations and shows and we
have no say and the price keeps going up
a lot of people are home bound and use tv as only source of entertainment - but
cable companies care less and keep saying over 55 doesn't matter.
we need say in what we are able to watch and we (over 55) do count
