I just wanted to let you know that it is awful that Verizon is dropping the RFD channel. I have been watching RFD every since they came on the air. My husband got us one of the big satellites so so that we could get RFD. Then 14 years ago Dish came to town and they were offering RFD, so went to them. I was raised on a farm and you can never learn to much. That is the on channel I watch except for local news. How are the people to keep up with bad weather since they are also dropping them. Mr Gottsch has a lot of info for us seniors, such as the meeting with AARP for whats going on with our social security. I though when you signed up with one of these company's they sign up according to the channels they will be receiving, and then the company takes it upon theirself to drop some of the channels that they signed up for, this is just not fair. We are so grateful that we have some one like Mr. Gottsch looking out for us seniors. Please don't let them get away with this, because if they do the other companies will start doing the same. Thank you for looking into this matter.
