For several years now I have watched RFD TV on our DirectTV system. The programming on farming, pasture lands, cattle auctions, and new chemicals available for use on my farm is very helpful to me in running my farm and raising cattle. I get the newest information regarding weed control for my pasture land and corn fields, information on what is new regarding the health of my cattle, and helpful information on how to invent new items to help me with my farm work. RFD also has a lot of very entertaining shows for when I come in to relax after a long day outside.

Please do what you can to keep RFD-TV available for all of the rural area. There is no other system that offers the kind of programming that RFD-TV does. There is no cursing, no sexually explicit movies or hard-core violence on there. It is all just down-home, wholesome, clean entertainment and very interesting programming that we aren't ashamed to show our grandchildren.

Thank you.
