I watch RFD-TV on Dish Satellite and I believe it would be a tremendous mistake to delete this channel from the current programming. I have subscribed to either cable or satellite communications for over 20 years and I am tired of the constant deletion of programming that is of interest to older Americans that is taking place now. There are times when I sit down in the evening and the only thing worth watching is on RFD-TV because of the constant replacement of quality shows with more inane reality shows aimed at stupefying the Millennials. I enjoy watching television in the evening after work when I am relaxing but I am finding less and less to actually spend any time watching due to the types of programs that are scheduled for evening viewing. I pay a pretty hefty monthly bill to keep that programming available in my house but if I don't have anything that really interests me I can easily find another venue for that money I am spending.
