Dear Mr Gottsch, as a young woman who had grown up as a "Tawnie," when we started getting RFDTV my husband, a farmer, was very interested in your shows. As time went on, I started noticing shows and enjoyed your channel and now probably 85% of our TV viewing is FRTV! I especially enjoy the human interest programs and even have gotten interested in many of the tractor & other shows. We will be very dissappointed to lose this channel & it should be educational for anyone who is not farm oriented. We live in an agricultural portion of New York State & are amazed at how little even people in our area know about farming - urban people need more info as to where their food comes from. Keep up the good work & do NOT give up the fight for rural America.
