I watch RFD on direct tv. It is the only reason I subscribed to satellite tv. I enjoy the country news and horse programing. You cannot get this coverage on other channels. There are millions of horse owners who not only live in rural areas, but in big cities. The coverage of education and events is great, the coverage of veterinary information is valuable to all. I also truly enjoy the music offerings. This channel needs to be available and should not be changed and dropped randomly from provider to provider.
