

Comment on RM-11759.

X This is a request to Deny Petition RM11759

I am opposed to petition RM-11759 as proposed by the American Radio Relay League.

Please do not take away these frequencies. My husband is an avid ham operator and this is where he and his friends communicate. They have used these frequencies since they became available and enjoy their time there. It has brought a positive enhancement to his hobby that I welcome. And the good news is, he is available to me to do my "honeydo" lists at his leisure. Thank you FCC for making these frequencies available in 2006.

Sincerely,

Linda Buchanan
