I watch RFDTV on a daily bases on DirecTv. This channel is very important network to those of us that are in the agriculture and/or livestock production. Please do not allow the carriers to remove this type of programming that is very important to us. we get enough "junk" channels as it is. RFD has a wide variety of educational and entertainment programming that I would compare to PBS programming. It is important to offer this type of diverse programming to everyone. You never know if the next young person viewing may become the producer of food that may land on your dinner plate. Sincerely, Christine Pontones.
