I watch RFD TV on dish satellite and would like to continue to watch ,it's important for our grandchildren to be allowed to see how their family members grew up and how technology has changed. Our 9 year old grand daughter enjoys the horse shows and our 6 year old grandson enjoys the old tractor so much he has began his own collection,he has his great great grandpas 1953 economy tractor ,and a Massey from his uncle ,our future continues by these young people learning from our history and current ways of rural life in America! God bless us all and please keep RFDTV alive
