I live in Falls Church, VA I watch RFD TV on Verizon. Since Verizon abruptly cut FIOS in this area, I am seriously looking at my options with competing cable companies. If Verizon reconsiders their decision and FIOS is reinstated, I will definitely stay with Verizon, because you are the best. I come from a farming family and currently own land in North Dakota. I depend on the programs RFD offers on farming, the weather reports, and the market reports. Continuing without RFD TV is not an option for me. No other TV programs offer what RFD does for the many people like myself. I am counting on the FCC executives to give serious consideration to this request, and the many other letters received. We want and need RFD TV programming back, and my first choice is to stay with Verizon. Thank you for your attention to this.
