I watch RFDTV on DIRECTV. I am very concerned about rural programming be squeezed out by the Urban Companies that control such programming. As an agricultural producer, RFDTV and other rural programming is an integral source of information I use daily in my business. Additionally I believe that RFDTV is being singled out due to the Faith base of many of its viewers. While urban areas and many (not all) of its residents may not find the programming of rural tv like RFDTV to be necessary or needed, we the people in the country find it completely enlightening and informative. Please put a stop to this unconscionable practice of squeezing out RFDTV.
