

60001549459.txt

I watch RFD tv on DISH network in my home, Regent, ND. We are family farmers and we have been farming in our family for four generations; over 108 years. We are doing the best we can to make a living raising food for our country and we hope to pass this lifestyle onto the next generation.

We feel very fortunate to receive information and programming in our rural area of North Dakota. This network, RFD tv, is specifically catered to our way of life since the agriculture, or food-producing, population of this country is shrinking. Also, staying connected to others in the same industry through RFD TV is vital for continued education creating awareness with updated procedures, techniques or events that we could apply to our farming operation to better ourselves. Doing so allows us to raise more food per acre which is a benefit.

Thank you for reading my input as to why I feel RFD-TV is vital to my industry. I Represent ideas of farmers, ranchers and the agriculture industry across this great country.

Thank you for your time.

Jill Anderson
