I am writing for myself and many senior citizens that rely on stations like RFD to get them through the day and night. I am 80 years old and only watch television of this nature. Their traditional music, farming, equine shows and the news is so beneficial to the world. I use DirecTV and if they should drop RFD, I will cancel with them. I can't believe FCC would consider dropping a network that is so informative in all aspects of life and with such integrity. Please consider all the shut-ins that rely on the clean and informative viewing and all the benefits to all their viewers. Thank you.
