I watch RFD-TV on the Direct TV satellite system. This network is very important to ranchers and farmer because of the great weather forecasts and current commodity prices given on a daily basis. We also enjoy the informative and entertainment shows. Ex. Farm shows, horse shows, mecum auctions, polka and the priestlys from Branson and also the informative shows on new products, live shows from the national implement shows and the other rural information that RFD provides to us. Please allow this channel to continue to operate, it is rural Americas most important network. Thank-You
