

60001551465.txt

I watch RFD TV on Direct TV and find it to be both vital to my farming business and entertaining. I have come to depend on the important information that is provided by this station. It is very important to receive these type of specialty stations even though they are not supplied by the "super powers" of broadcasting. Please provide a platform for these independent stations to continue without being forced off of the air by the big providers.
