I am in favor of approval of docket number 11-42. Expansion of the Lifeline program to allow for broadband use by low-income families is not the only solution to bridge the digital divide, but it will improve the lives of millions of low-income Americans and provide all students an equal opportunity to have access to important digital content that can personalize and improve learning and insure they graduate from high school prepared with the necessary college- and career-ready skills and knowledge to be successful in school, work, and life.
