

60001553157.txt

We watch RFD-TV on DISH satellite.

We are hopeful there is something you can do to keep RFD-TV and other independent channels on the air. It is an important part of our household TV schedule. RFD-TV has programming that is difficult to obtain on mainstream channels. The programs are informative, decent and family friendly.

Although we do not live on a farm, we find this programming fills a need not normally being met elsewhere. We don't see why there is not room for these programs which help bridge the gap between rural and urban America. We spend many hours a week with this channel and hope it could continue.

Please help!
