My letter to you is to give a lot of thought about continuing the RFD programming. It is an excellent station for producing programs for all ages. It is the only station that has a big variety for the agriculture producers that includes animal care, crop chemicals, youth activities, recipes and cooking, young children programming and many other including sewing for the women. Remember this is the only Network Station for the agriculture residents. Where would our country be if we didn't have farmers? They produce all the food for our growing population. So would you deny all this information to them? That doesn't even mention all the musical programming that also has something for everyone!! So please consider all the above.
