Dear FCC, the RFD TV channel is seen in my area through the ETC cable company in Ellijay, GA on channel 19. I implore you to do all that is possible to keep the RFD channel on all cable networks and satellite networks. Most people in the USA do not have knowledge of how important the farmers and the farming industry in our country is to America. Most children and many adults have no idea how their food gets to the grocery store. The RFD channel teaches these people how food, cattle, and other rural farming processes are the backbone of the survival of America. The family programming is also desperately needed in our country. Please make the 5 major cable providers keep the RFD TV on all networks!
