I watch RFD-TV on AT&T Uverse and on DirecTV at another home. I pay dearly for the programming which includes RFD-TV because we depend on the news, weather, and other programming which is ONLY available on RFD-TV to help us manage our agriculture land and farm. The information we get on RFD-TV is generally never covered by other networks! Please do not allow RFD-TV to be removed from the air! We feed, clothe, and shelter the people of America -- removal of our best agriculture/conservation news source would be very self defeating! We say NO. Thank you for your consideration.
