Mr. Wheeler, I oppose Charter same reason with all cable companies including Time Warner cable which I have this country cable industry has a HUGE problem that is with internet, phone, and WiFi is down or your booted off line several times. I check outages of Time Warner cable and Charter outage map daily on Down Detector. You can see the map of the USA and where the outages are these two companies have outages everyday. My internet and phone services are down several times it's frustrating. We pay too much money for poor signal service when you can make a phone call or use your internet there is a problem. I oppose Charter and Bright House. Have to fix what is already broken. Neither company can't even do that.. Thank you..
