I watch RFD-TV on Directv and it is essential for me because i trade commodities and i use their information to update my trades. The rest of the day and weekends we enjoy the rural programs on farming, ranching, music, and Agricultural Education. RFD-TV has wholesome programming that it is sound for the whole family and just to know that this cable and satellite companies want to cut it from steaming is wrong. This companies cannot block programming just because they do not like it. It is a constitutional violation in my view because they a blocking the view of rural america. I support the investigation for this actions and will accept the final deci si on.

Thank You;  
Victor M. Tamez
