

60001562047.txt

I watch RFD on ATT Uverse.

Please, continue to provide this programming .

I live in an urban environment . Local and national news programming doesn't provide the information on rural issues. It is imparitive that we have access to farm, poultry and cattle production. We in the cities are dependent upon farms for our food. We must be kept aware of what is going on with the production of our vfood.
