I watch RFD-TV on Direct TV Ch. 345 in Baton Rouge, LA. Please continue allowing independent networks like RFD-TV the access to regional and national television broadcastings. The independent network allows me to learn about agricultural in my area of the country and in areas of the country where I have vested interests in agriculture. "Regular" national and local networks carry very little, if any, information about ag business and ag markets. RFD-TV covers those topics plus human interest stories about ag and ag education. These are important programs that should be available to all people.
