PROGRAMS FOR OUR AGRICULTURAL INDUSTRY ARE VERY MUCH NEEDED!!! It is very upsetting to know that Verizon would even consider discontinuing a channel that we watch daily from morning until bedtime. We watch the RFD channel on DirectV nearly all day, every day. We rely on the RFD channel for all our markets, rural and agricultural news and programs, cattle sales, entertainment and more. Without the RFD channel for us to watch there is not much reason for us to subscribe to our satellite service. As a matter of fact, since we now get our cell phones and land line service from Verizon, if RFD is discontinued from our satellite service, we will be forced to find another contract carrier other than Verizon to service those as well. We will not support Verizon any longer. This is a VERY IMPORTANT educational channel for our AG Industry in the US. It is also a channel that everyone can watch and does not have to be censored for our youth. Would you please RECONSIDER your proposed decision and NOT cancel RFD programming.
