I watch RFD-TV on Dish. It is the most important channel on my TV. From enjoying a variety of music programs to Ad Day Weather news market Day report Hidden Heritage California Bountiful Trains Tractors our on the Land Rural News on all kinds of food we eat where it is grown to how it arrives at our table. We are lucky to have such a channel and hope it will be available to everyone both rural and city. Save RFD-TV from Verizon they should not have the say of what people can watch. Plus also Dish and Direct TV charges way too much for people who have no choice but their cable to go to. Way to many commercials for a 1 Hr program. The channels they provide is debatable for the money. From reruns over and over to selling on the other channels. We need the FCC for a voice of what we must pay for for what we receive.
