We watch RFD on Direct TV each day of the week. My husband and I are retired dairy and cash crop farmers. Now our farm land is rented out. We still live on our farm. We want to keep informed on grain markets new farming equipment, types of seeds, fertilizer and costs. Those programs on food and fiber are very interesting to us. We are elderly and can not attend the farm shows anymore, RFD keeps us informed on agriculture so we can talk intelligently with out farmers. We have been active Farm Bureau members for 74 years. Also over 6 children were active in 4-H and FFA. We always watch the national FFA convention. The entertainment shows are great. My husband really likes the Molly B Polka show, Larry's Country Diner and Bill Gai ther and many other shows. We do not care for the evening shows on the networks because of the language used etc. Please keep RFD on! People need to be educated about where their food and fiber is grown.
