I watch RFD-TV on DirecTV. The easiest, most entertaining way to keep up with new developments in farming and animal husbandry. The disconnect between urban dwelling and rural citizens can only grow greater if the information available on RFD-TV is not disseminated widely. Equality and non discrimination are the basis of American life. We rural citizens are just as entitled to broadcasting apropos to our lifestyle as urban citizens are to broadcasting reflecting theirs. Enjoying both kinds of programming can help foster cohesiveness and community between all the citizens of the country.
