I watch RFDTV on Dish. We ordered the larger package just to include such rural programming. As an older couple, we appreciate informative shows for agriculture. As well, we like to choose programming that offers something from our generation as well as things we believe fit our values. So many other things we have to pay for to get RFDTV don't justify the money but we are willing to pay so that we have RFDTV. Please do not allow commercial companies to offer something then take it away without the customer being able to choose what they want. Thank you!
