My family listens & watch RFD-TV most of the time. We like the variety of programs. Rodeo, cooking, music, weather, working with horses, farming, machinery shows, FFA.

Farming has been our life, raising Beef cattle, hogs, hay, corn & soybeans.

Our friends in the cities need to know were their food is grown and the work required to get the products from planting to get to the grocery for all of us have good food. Some doesn't relize the hard work it takes the get it to market. Farmers are proud people and want the best for the people. There is more to it than go to the store & get it.

Joyce Williams
