I currently subscribe to Direct TV. This in regards to Proceeding Number 16-41 and your office watching to discontinue broadcasting RFD-TV. This would be detrimental to viewers, because I for one depend on this program to keep up with information on cattle markets. It keeps me up to date and without it I would be lost. My family and friends discuss different programs that we enjoy. Please rethink about discontinuing, your viewers have many different needs and interests, please provide for us all. Without the availability of RFD-TV I would need to rethink the need for satellite. It's educational about country life and people in the cities can learn where their food comes from by watching this station.
