We watch RFD-TV on Cox TV here in Northwest AR. We are senior citizens and we like RFD-TV very much. We like all the rural and senior programming from music, horse/cattle shows, crop conservation to the Red Stegal show. All the programming is great compared to most of the other major networks that have non-top crime and killing shows all the time. It is too bad that RFD-TV and the weather channel and outdoor sports were taken away from the people in Northeast US by Verizon Fios. Is there any way to get RFD-TV restored to the Northeast part of the US? Also is there any way to prevent it from happening again?
