We have found most often when turn any program on RFD to be so very good be it any and all. We have learned to the many things you have given us. From the fields and what they give. The Tractors and all different equipment and so often you have many ways to help us to know better to take goo care of it. My first great time was an auction of the black Angus. Made me want to keep learning. It was a auction for farm machinery, carry from the wives, husbands, children that seem to help and they learn to love it. Big ranchers, such green farms and how these families from spring and how that get all produce and such to all of us to get it fresh in our groceries for homes. We thank you. Horses, Cows, gentle giants, pigs, chickens and so many, now how you take such care of each. We have learned a lot. We get often when we turn some programs of music. We love it all. Rodeos we watch is rally a new things for us and will keeps it up. We like so much with the news, weather, the history that we adsorb week. Ray Eyer, grew up raising pigs and lived on family farm. Ray is my husband and loves these same programs. Thank you so much Virginia E. and Raymond E. Eyer
