

For years we have been enslaved by the cable companies, forcing us to use their DVR set tops to do our recordings. This has cost us more then \$4,000.00 in the past ten years AND we have no control over the content.

Our grandson won the State Basketball championship two years ago, and when the hard drive on TimeWarner's box went bad we lost a prices recording. Had I been able to record on my computer, with backup, we could have maintained a cherished family moment.

Give the public the choices needed for us spend, control and maintain those items of great importance. It's past time for the hand of greed controlling our personal viewing to be severed!
