As a current employee of Time Warner Cable, I must keep my name and address anonymous, since I would risk losing my job revealing it. We were recently informed that the merger will result in mass relocations and/or terminations. Also, we will lose our pensions and other benefits. The exparte comments about creating jobs may be true, in that they will be creating jobs for those who are terminated, but there will be a net loss. I request that the FCC deny the proposed transaction completely.
