I watch RFD-TV on Direct TV on a daily basis. I and my wife enjoy the musical shows and the horse training shows which are not available any other place. I am a farmer and RFD has information that impacts my business such as market prices, livestock information, equipment information, weather impacts on crops, seed and fertilizer news. They also discuss diseases affecting crops and farm animals as well as upcoming preventatives of same. There is no other programming that has such a diverse schedule of important information that we as farmers and cattlemen need. And all on one channel!!!
