

60001569184.txt

I am currently a Uverse subscriber, which AT&T has decided to phase out in the future in favor of DirecTV and DirecTV does not carry OANN. Neither do any of the cable companies. As long as these companies continue to have monopolies to provide services to different areas the subscribers should be able to demand a product be carried by these monopolies. As a subscriber, I am respectfully demanding of all the providers that they carry One America News. The only unbiased news organization left. The only news organization that I can get both national and international news, not just snippets of international news where the U.S. is fighting a war, but news that is meaningful that affects the lives of all the peoples of the world.
