The school district created an online BEAR Form on July 16, 2007. The school district employee who created the BEAR Form, left the district and never informed anyone that he had not completed and certified the Form. The school district did not discover this error until August 2015, when the online BEAR process was used and the district noticed an “incomplete invoices associated with this PIN” on their billed entity applicant home page. An appeal was filed with USAC on September 15, 2015 for an invoice extension case no. 22-845128. Because the invoice deadline had long since expired, USAC recommended filing an appeal with the FCC for an invoice deadline extension.

We are requesting a favorable ruling on this invoice extension request.

Thank You,

Jack Rienstra
