Rfd tv is a vital part of life for our farming and ranching information and reports out here in west texas. Plus there is so much good programs that families can watch without fear of exposing your children to wickedness of the tv world. My question to the fcc is why don't they work as hard to get the filth off of tv instead of protecting the filth. It shames me today to see how much filth is on tv today as compared to 40 years ago. You are just like the story of the frog in the kettle you have compromised the Godly moral values for the wealth of the world. If i were you i would be trying to find a whole lot more programs like rfd tv than the trash that you allow to have the air waves.
