CC Docket No. 02-6

On April 12th I submitted 470, Application # 160044498, for Category 1 Services for fiber. I didn't realize prior to then that I could have also included the costs of maintaining the fiber into the building. I'm writing this letter of appeal to request an extension for the second 470 to allow enough time prior to submitting the 471 for those services. I would like the opportunity to submit a 471 after the allowable contract date of 5/11 now that the deadline for 471 has been extended.

Thank you for your consideration.
